

PUBLIC NOTICE

California Code of Regulations (CCR), Title 19, Division 2, Chapter 4.5, Section 2745.1(a) requires facilities that handle regulated substances above certain threshold quantities to prepare a risk management plan (RMP). The goal of the RMP is to prevent chemical accidents that could happen to the public and the environment and to reduce the potential impact of an accidental release. The RMP contains off-site consequence analyses that evaluate specific potential release scenarios; a history of accidental releases; an integrated prevention program to manage risk; an emergency response program; and a management program to oversee the implementation of the RMP. In accordance with California Health and Safety Code (HSC), Division 20, Chapter 6.95, Section 25535.2, RMPs for the following facilities are available for public review and comment at the Placer County Health and Human Services Department, Environmental Health Division, 3091 County Center Drive, Auburn until August 16, 2017:

Sierra Pacific Industries
1440 Lincoln Blvd.
Lincoln, CA 95648

Please direct any questions regarding this notice to the Placer County Environmental Health Division at (530) 745-2331.
